GET YOUR CISCOM CERTIFICATION FROM THE USA

➔ **Module 1: PLANNING**

Module 1 lays the conceptual foundation in supply chain and operations management. Topics reviewed include Sales & Operations Planning, Master Scheduling, Capacity Requirements Planning, Materials Requirements Planning and other.

➔ **Module 2: ORGANIZING**

Module 2 focuses on supply chain coordination, to enhance customer service while gaining cost efficiencies. Topics include supply chain channels, infrastructure, complexity management, diversification, integration and more.

➔ **Module 3: DELIVERING**

Customer satisfaction is the main objective of supply chain management. Here, you will learn about customer service, inventory management, distribution, manufacturing, costing and other critical aspects of supply chain and operations management.

➔ **Module 4: GROWING**

Profitable and consistent growth is the objective of every business. However, external and internal challenges can cause the focus to shift from long term sustainability to short term expediency and putting off bush fires. The module includes review of Lean, Sigma and other tools.
